Peña's Disposal hosts 'Recycling Night' Aug. 28 at Visalia Rawhide game

CUTLER – The first 500 Visalia Rawhide baseball fans in the gates on Saturday, Aug. 28, will receive a free grocery tote, as Peña's Disposal hosts 'Recycling Night' at the ballpark.

As the night's sponsor, Peña's Disposal will have a booth on site that will help people understand the benefits of recycling and learn what can be recycled. Game time is 7 p.m.; gates will open at 6 p.m.

Based in Cutler, Peña's Disposal was the first company in Tulare County to start a recycling program, and was the first on the road with "green" vehicles.

"We understand that recycling is about creating a better tomorrow, and every day we strive to teach people what they can do to recycle," said Art Peña, owner/vice president of Peña's Disposal. "The goal for our industry now is zero waste, and Peña's is taking this important initiative very seriously."

Peña's operates a waste hauling business, a state-of-the-art, 62,000-square-foot Materials Recovery Facility (MRF) where recyclables and e-waste are collected, a chipping and grinding operation for green waste, two certified recycling centers, and a fully permitted construction & demolition facility.

Established in 1949 by Salvador Peña, Peña's Disposal Inc, is a family-run company that in the past six decades has made a name for itself as a customer service-focused and innovative company. From simple beginnings as a way for Salvador Peña to collect food waste for his pig ranch, Peña's has grown into a leader of disposal and recycling services serving residential and commercial customers in Tulare and Fresno counties.
